### PART A – Introduction

1 Do you agree with the principle that regulations be kept to the minimum necessary and that more detail be provided in guidance and kept updated?

No

Please explain why you agree or disagree::

I'm unsure of the reason for trying to keep it small. I imagine it's because it's proposed that this will allow better flexibility, though deregulation does allow for more mistakes. As the decision-making around this topic is vast, it's open to human error, and as such deregulation may not be the best option. It doesn't need to be complex just because of volume, the complexity can be managed through good design. Design can break complexity down into small sections which are then easier to understand. Big is not always bad or complex.

2. i) Do you have any views on the content of the interim assessments?

Yes

Please explain your views::

Development plans should support space for temporary spaces for the purpose of mobile libraries, galleries and cinemas to ensure that there is a place for the community to gather to access temporary cultural services. Gathering together creates an opportunity for connection and belonging, preventing isolation.

20 minute neighbourhoods are not workable in rural Scotland and as such spaces for mobile and temporary access have to be considered.

3. ii) If you consider that full assessments are required, please suggest any information sources that could help inform these assessments.

Please put down your suggestions here::
